Total Sales	Total Profit	Profit Margin %	Total Orders	Avg Order Value	Ship Cost %	Revenue Growth %
\$12.64M	\$1.47M	11.62%	25.04K	\$505.01	10.7%	▲ 90.3%

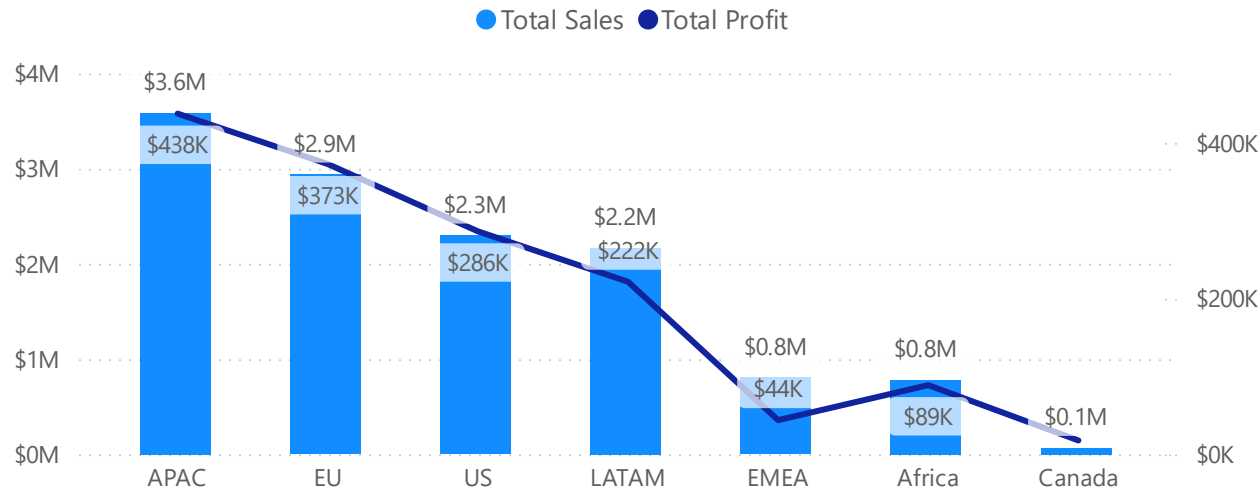

Business Profile:

- Revenue increased by 90% between 2011 and 2014, reaching \$4.30M in annual sales.
- 25K+ customer orders across 51K+ transactions generated \$12.64M in revenue while maintaining an 11.6% margin.
- Logistics costs represented 10.7% of total revenue during the period.
- Monthly sales volumes were generally higher in the second half of the year.

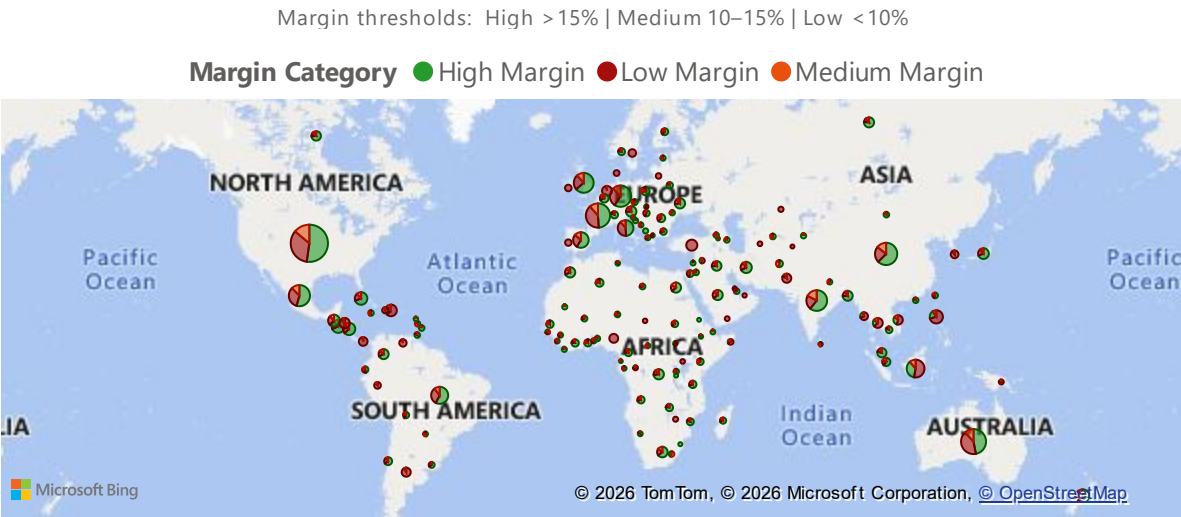

Market & Regional Analysis

Market Revenue and Profitability

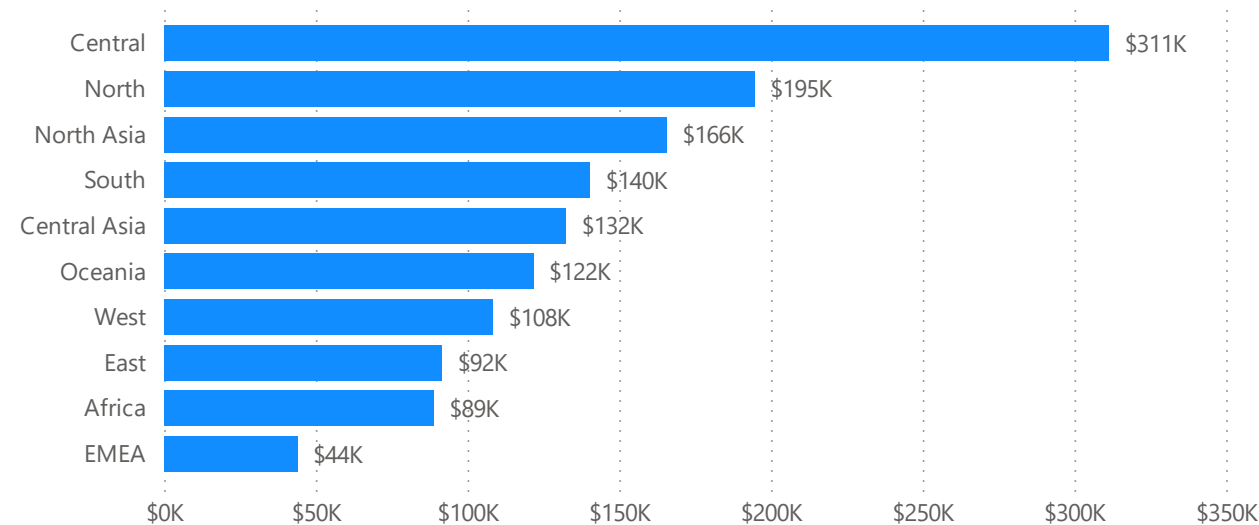

Europe achieves strong profitability despite lower sales volume than APAC.

Global Sales & Margin Distribution

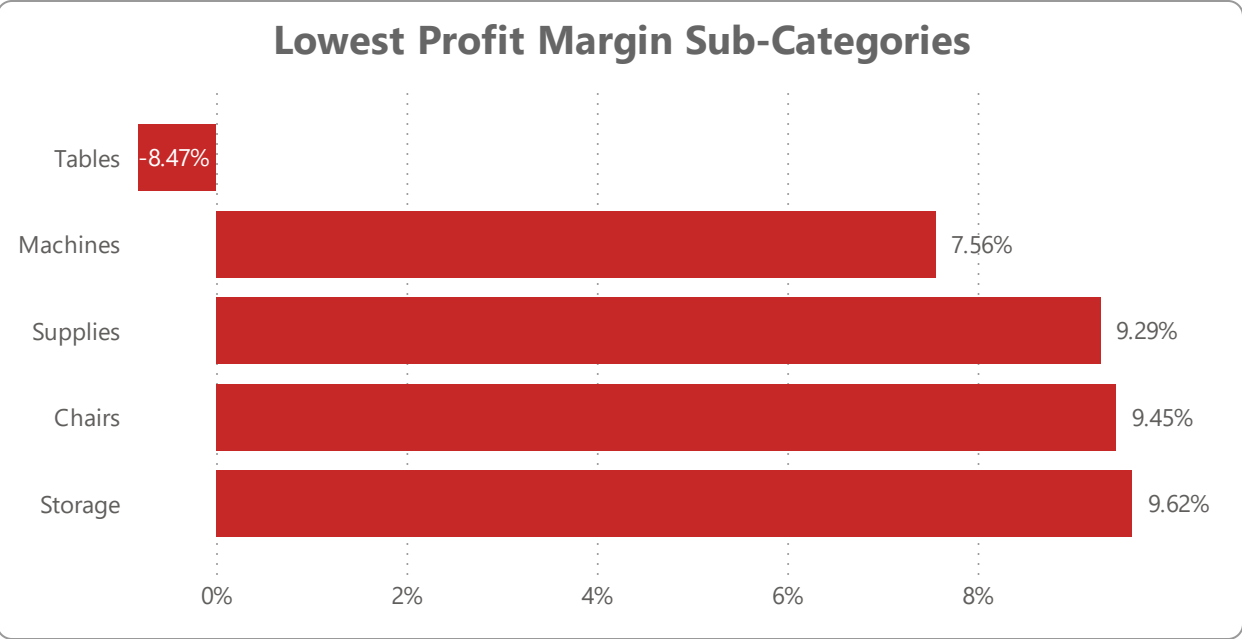

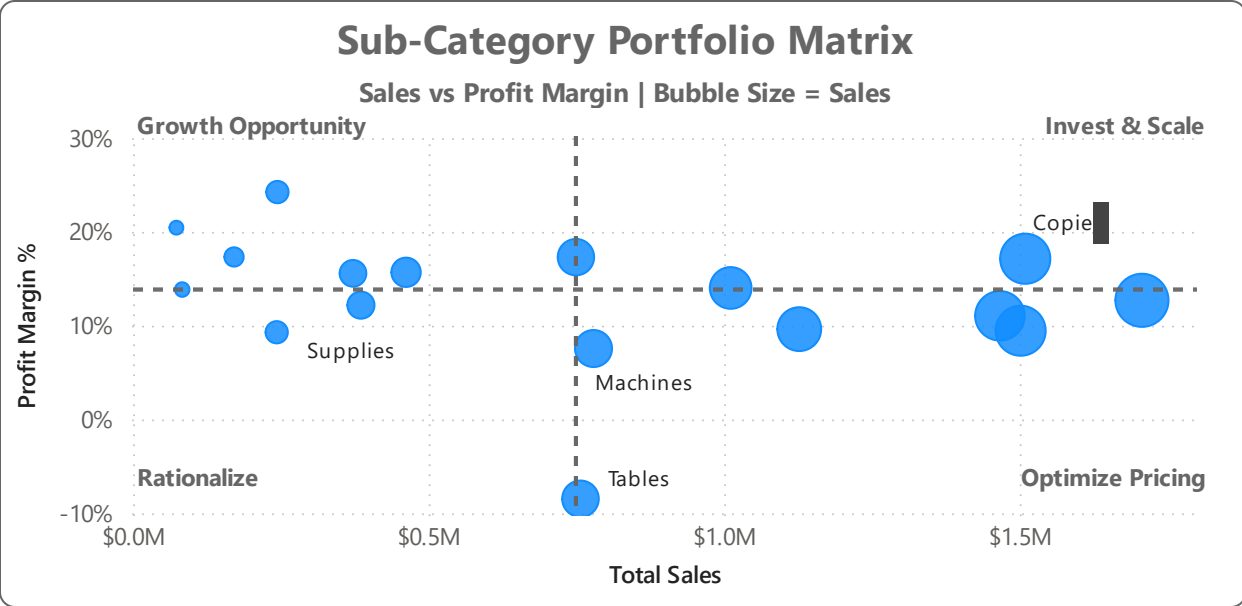

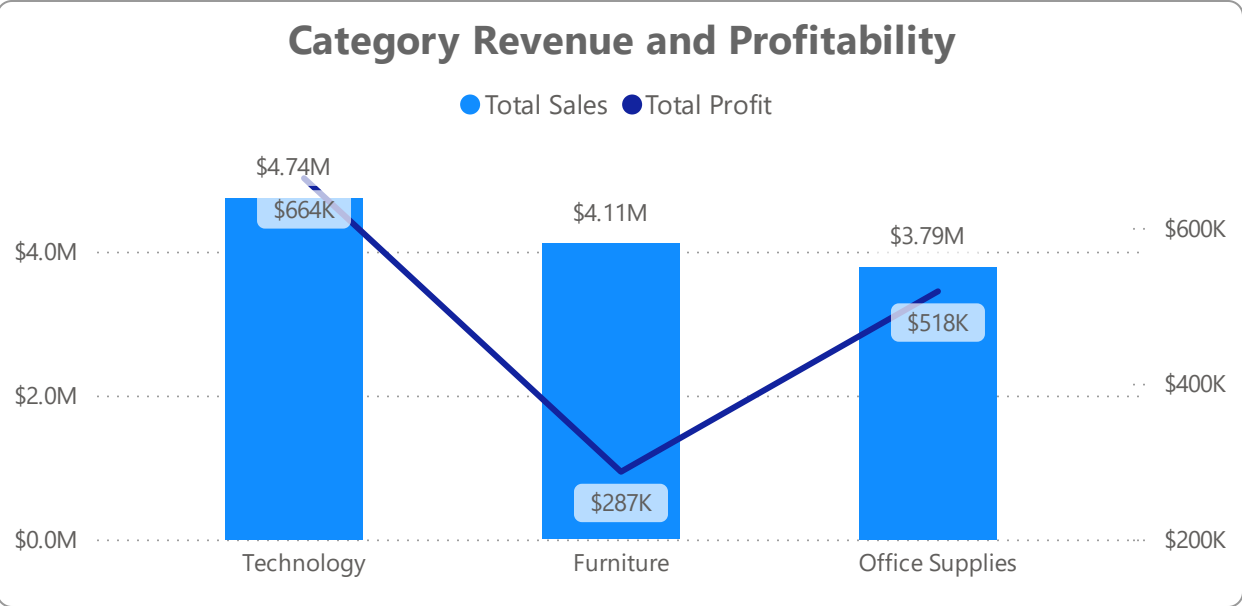

Highest Profit-Contributing Regions

Key Takeaways:

- APAC generated the highest sales (\$3.6M) and profit (\$438K) among all markets.
- Central region led regional profitability with \$311K profit contribution.
- Canada and EMEA contributed less than \$50K profit each, limiting their overall impact.
- Profit remains concentrated in a small number of regions.

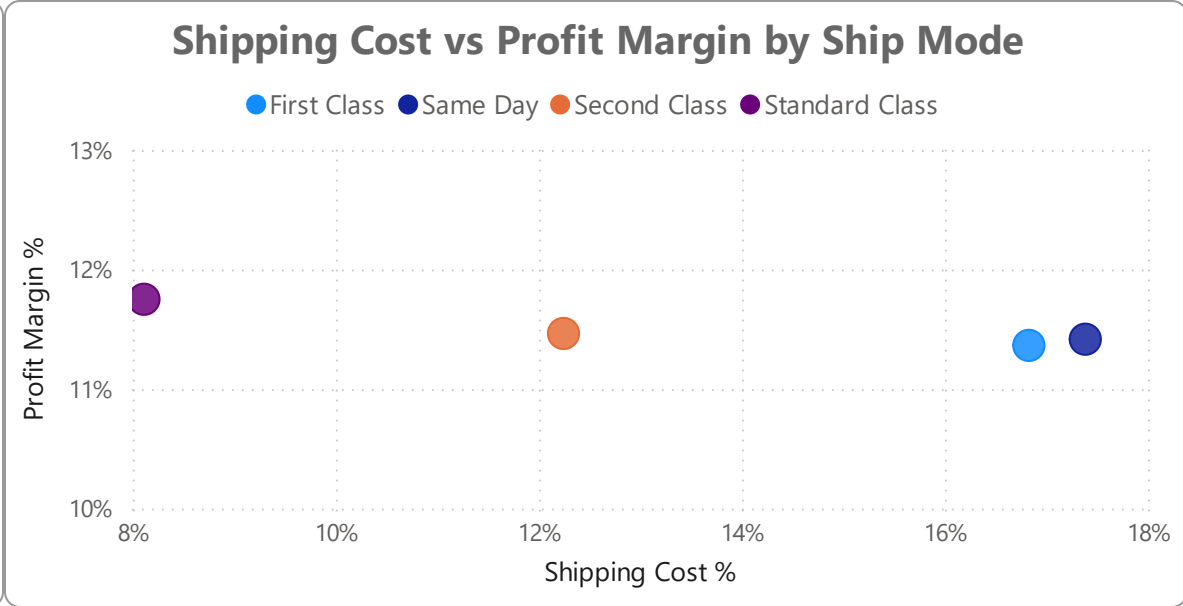

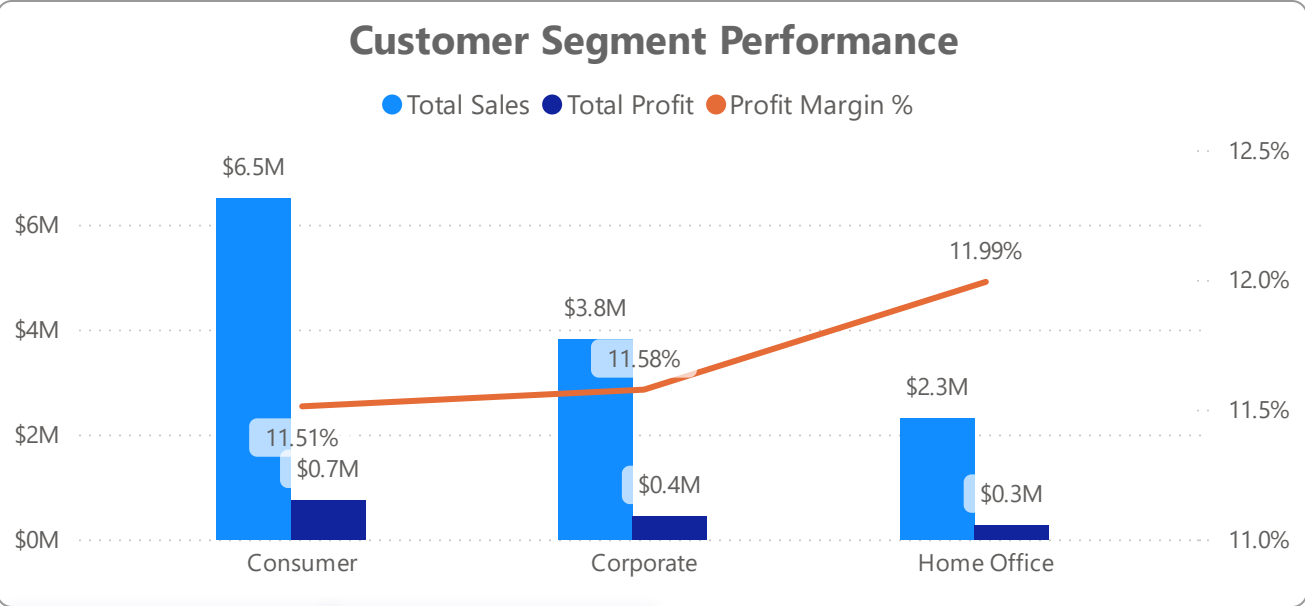

Product Performance Analysis

Key Takeaways:

- Technology generated the highest sales (\$4.7M) and profit (\$664K) among all categories.
- Furniture produced sales similar to Office Supplies but delivered the lowest profit (\$287K).
- Tables remained the only loss-making sub-category with a negative margin (-8.5%).
- Copiers had high sales with the strongest margins, while Machines generated lower returns.

Customer & Shipping Analysis

Unique Customers

795

Revenue per Customer

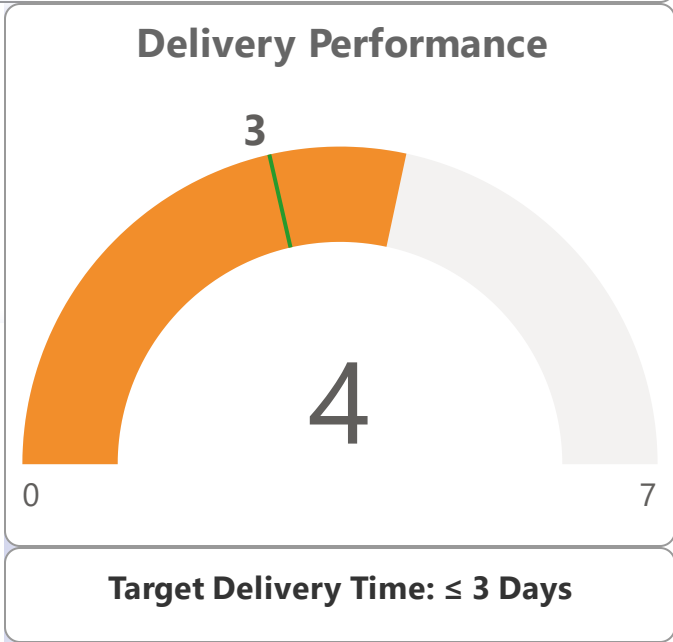

\$15.9K

Profit per Customer

\$1.8K

Average Shipping Days

4

Key Takeaways:

- Consumer customers generated over half of total revenue and profit.
- Home Office delivered the highest margin (12.0%) despite the smallest sales base.
- Standard Class operated with the lowest shipping cost ratio (8%) while maintaining comparable margins.
- First Class and Same Day shipping increased shipping costs to nearly 17–18% of sales.
- Average delivery time was 4 days against a target of 3 days.

Discount & Profitability Analysis

Average Discount %

14.3%

Revenue Under Discount

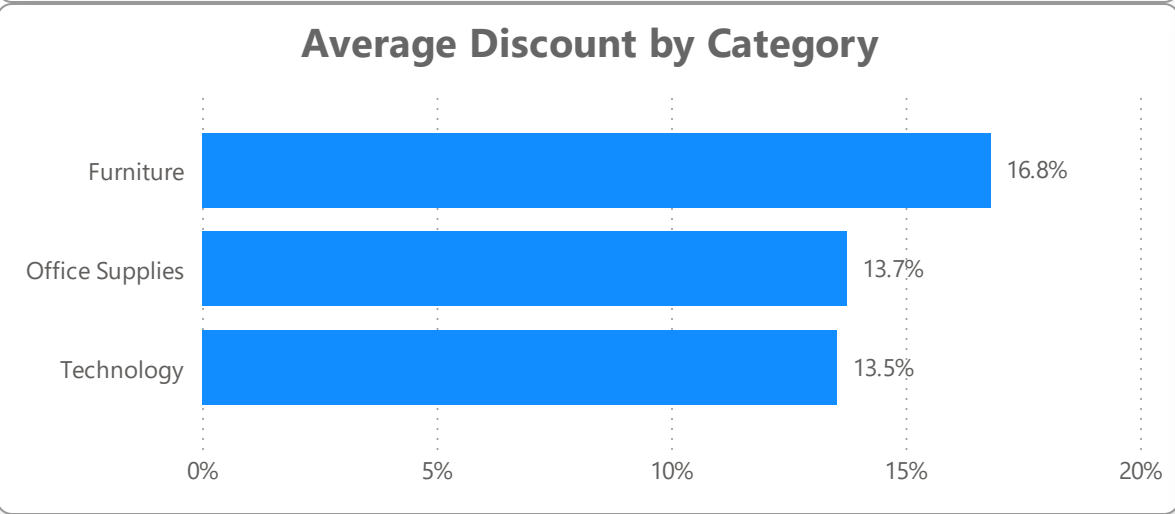

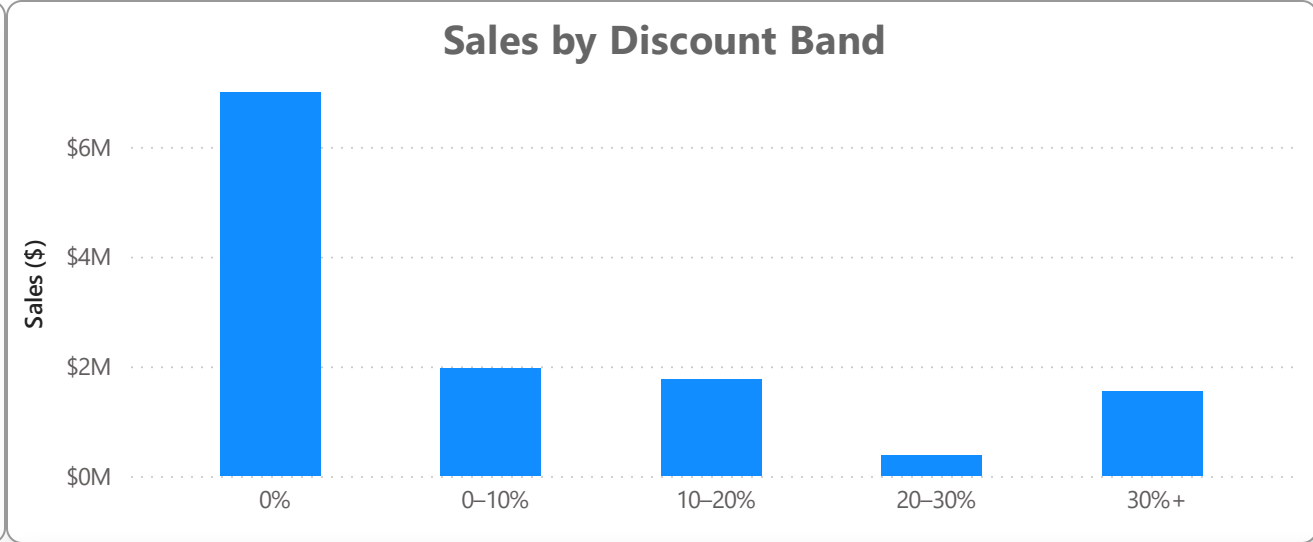

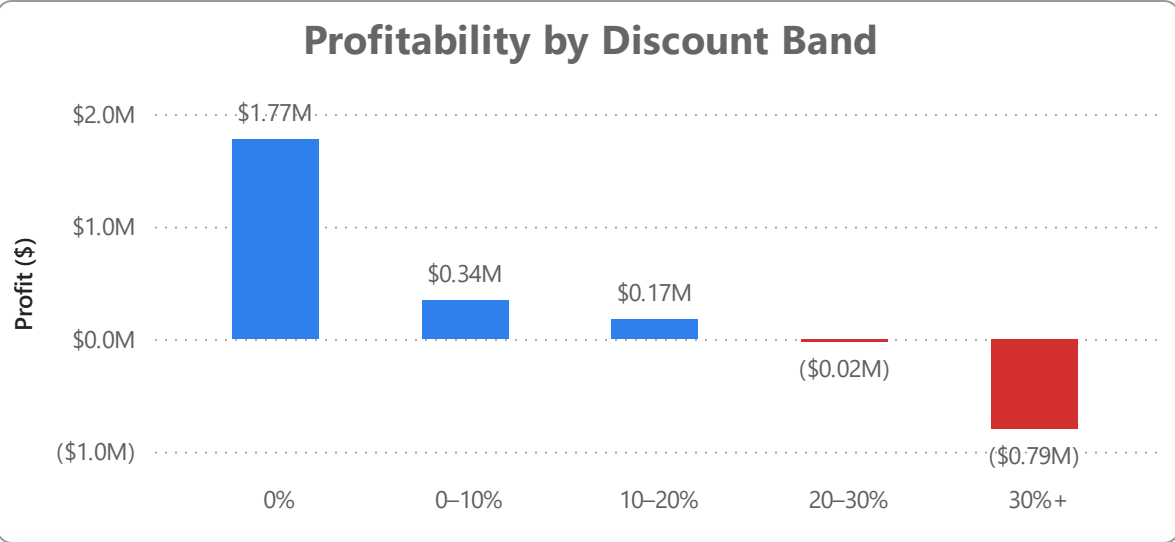

\$5.65M

Profit Impact of Discounts

-301.66K

Percentage of Orders with Discount

48.54%

Key Takeaways:

- 48.5% of orders received a discount, accounting for \$5.65M in sales.
- Discounted orders resulted in an overall loss of \$302K despite strong revenue contribution.
- Orders with discounts above 30% generated the largest losses (-\$794K).
- Furniture carried the highest average discount (16.8%) among all categories.
- Profit declined steadily as discount levels increased.

Business Insights & Next Steps

Total Sales	Total Profit	YoY Sales Growth %	Margin change (pp)
\$12.64M	\$1.47M	▲ 26.3%	▼ 0.3 pp

Summary:

- Sales nearly doubled between 2011 and 2014, while profit margins remained stable around 12%.
- Heavy discounting improved sales volume but reduced profitability, especially beyond the 20% discount level.
- Improving pricing discipline and operational efficiency offers the clearest path to higher margins.

Priority Areas for Management Attention:

- Loss from 30%+ Discounts
\$794K
- Lowest Margin Sub-Category
Tables | -\$64K LOSS
- Profitability Threshold 20%
Profitability declines beyond this threshold
- Same Day Shipping
17.4% Cost-to-Sales Ratio
Highest among shipping modes

Recommended Actions:

- Keep discounts below 20% wherever possible to protect margins.
- Review pricing for Tables and other low-margin Furniture products.
- Continue investing in Phones and Copiers, which combine strong sales with healthy margins.
- Encourage Standard Class shipping where delivery timelines allow.
- Use Europe as a profitability benchmark for other markets.
